

JM Network Consulting Inc. is an Internet professional services company. We blend advanced business, technology and creative fundamentals with proven approaches to develop, design & implement Web-based rich-media over wired and mobile network infrastructures.

JMNC delivers carefully engineered alternative and rich media solutions to maximize value and broaden visibility through the global delivery of information across a range of presentation mediums and network infrastructures.

Integrators: Integrating sound business strategy, advanced technology and creative development, we bring a new dimension to web-based media to our clients. Our solutions build brand and stimulate business over the Internet. Combining advanced web-based systems with structured creative content development. Our services create competitive advantage and increase market penetration for customers and business partners. The web site design teams specialize in the design, construction, and management of your web development project from start to finish. With **JMNC's** depth of experience in a wide range of applications, our web consultants are uniquely qualified to create the ideal web solution for your business. A wide range of companies, from small businesses to Fortune 500 companies, trust **JMNC** as their web development solutions provider. Here are a few reasons why:

Superior Customer Service our web development teams are committed to our client's success. We recognize that success on the web takes ongoing effort and are committed to helping our clients reach their goals over the long haul.

Comprehensive Solutions We provide comprehensive solutions including web page design, web hosting, network consulting, internet connectivity, and much more.

Experience our graphic designers and engineers have years of experience creating solutions to challenges much like those you face. We know how to balance the cost efficiency of off-the-shelf solutions with your custom requirements and brand.

Focus on ROI We seek to understand what is important to our clients. We want our clients to be successful on the web and are committed to help make that happen. Our teams will often have suggestions based in experience for how clients can make the most of their web investment.

Value / Benefits Engaging **JMNC** you receive personal and close attention to detail. We align design, development and implementation efforts to your desired and identified business objectives and we keep a close eye on scheduling and cost control.

The integration of creative, technical, business and management expertise combined with superior project management is our primary value proposition to our clients. As you take your business to its next evolutionary stage by integrating business and Internet technology to your advantage, here are some strategic and tactical benefits you can capitalize on through **JMNC** services.

JMNC is composed of experienced certified engineers and technicians with areas of expertise ranging from LAN/WAN design, to network security, business process development and technology implementation.

JMNC Partners Services focus on improving our clients' ability to respond more quickly to business opportunities as well as strengthening already established relationships

Our strategic vendor relationships complement our core competencies and in turn help deliver significant and measurable returns to our clients. Collaboration with web-services and technology leaders ensures our solutions connect with clients' overall business objectives and deliver competitive advantage.
